How do I do that?For example, can I make the file on the side just go in further? And let's say I don't want to change the width of the other side. A: You can use padding (padding spaces or padding characters) to add spaces in the output. For example, to put the label on the left and the input on the right, use padding="10" (padding is measured in characters). To show how padding works, here is the code with padding="10": Label: The above can be directly copied and pasted in your output, or it can be done with a simple jQuery or JavaScript function: Label: var padding = 10; \$('#myform').css('padding-right', padding); You can read more about it here: You can also use padding on the label to align it above the input, as in the example below: Label: You can read more about it here: You could also use a custom CSS class to style the label, like label.label-input. Hope this helps! I have passed over to "The Other Side" Today, but I wanted to let you know that you are all still in my prayers. The way you people have gone about showing your love and support is truly remarkable. If I had to walk through this again, I ba244e880a
